A LINE THROUGH TIME

THH orchestrated a captivating launch for Dubai's Blue Line, fusing subtle tunes and a ballet of light that turned the city's vision into an immersive stroll under the stars for HH and onlookers.

Drones danced to depict HH's face in the sky, while the Creek station and a light bridge previewed the metro's path, all choreographed to a crescendo of music.

As the musical peak heralded "The Blue Line" in glowing letters, a simulated metro cabin glided across the canal, culminating in a dramatic fireworks display in the metro's blue and white. This event wasn't just a grand opening; it was a narrative of Dubai's march towards a connected and dynamic future.

EXPANDING HORIZONS

THE GROWTH OF DUBAI THROUGHOUT THE DECADES PAINTS A CLEAR PICTURE OF A HOLISTIC STANDARD OF PROGRESS. AND AS THE CITY EVOLVES TO BECOME ONE OF THE BEST METROPOLISES IN THE WORLD, DUBAI'S ROADS AND TRANSPORT AUTHORITY (RTA) OPENED YET ANOTHER FRONTIER OF PROGRESS.

Replicating the region's organic and rapid growth, we designed an entire experience that unveiled the newly created nature reserve south of the city. Following the concept of biomorphism, we highlighted the organic nature of Dubai's development and its harmonious relationship with the region's natural beauty.

This launch event was attended by Sheikh Mohammed bin Rashid, Vice President and Ruler of Dubai, along with high dignitaries and VVIPs.

HUAWEI'S WEARABLE RENAISSANCE

HUAWEI introduced its latest wearable collection, marrying style with cutting-edge tech, and celebrating a decade of innovative design.

With "Fashion Forward" as its mantra, the launch spotlighted HUAWEI'S devices' advanced features, especially in health and lifestyle.

Set in the lavish Armani Hotel, attendees were captivated by a unique floating watch display, emphasizing HUAWEI's underwater capabilities. This luxurious setting, fused with our dedication to excellence, ensured the event was both memorable and inspiring.

STAND TALL

As Geely accelerates its mark across the UAE, it's not just about cars—it's about envisioning the future of vehicular innovation. To commemorate the grand unveiling of the Geely Monjaro, a vehicle symbolizing the harmony of time, space, and cutting-edge technology, we crafted an unparalleled journey.

Drawing from the Monjaro's motto, "Stand Tall," guests embarked on a picturesque drive from the Geely showroom up to 1484 by Puro, the UAE's loftiest restaurant nestled atop the breathtaking Jabal Jais mountains.

Amidst the soaring peaks, attendees reveled in the Monjaro's launch, treated to lively performances, captivating outdoor exhibits, and an atmosphere as unforgettable as the car itself.

TODAY. TOGETHER. TO THE FUTURE.

Attention to detail is always key to success – wherever one might be. And for their Aftersales Conference, Nissan wanted to create a comprehensive experience with perfection down to the smallest detail.

So, we took care of everything from the presentation content to the conference flow, and we even designed the space to make it visually appealing. But the real icing on the cake was the seamless journey that comes from the sum of all elements – activations, presentations, stage direction, and space design. It was a complete experience that got everyone involved and excited.

In short, we made sure that the attendees felt like they were a part of something special and had a blast while they were there.

LAUNCHING (INTER)STELLAR EXPERIENCES

To celebrate the successful launch of the Vahsat Satellite, we created a thrilling challenge to launch the team into an interstellar experience at the du forum.

The entire experience follows the actual procedure involved in launching satellites into space – from the early stages involving collection of satellite parts, to the latter stages where the satellite sheds some parts to maintain orbit. And, just as the space race is a race against time, we measured the teams' performance through RFID tags. The stakes are high as the winners get a trip to the Kennedy Space Center.

And to make the event exciting for everyone, we included various side activities for the on-lookers as well as a huge space for them to watch the launch unfold.

INTELLIGENT ON ALL LEVELS

Intelligence manifests in more ways than one. And the Sharjah Girl Guides launched a mission to help the youngsters discover which types of intelligence they possess — so that they can harness their talents for a bright future.

Through our Brain Dare concept, we explored eight (8) multiple human intelligences as defined by Howard Gardner, and celebrated each one with custom-made activations. At the end of the event, the participants received a report card detailing career prospects based on their strengths.

For the first time since SGG launched this yearly event, we helped them utilize a monitoring system to guide the improvements of their services – all while guiding the youth to a brighter future. Indeed, this campaign is intelligent on all levels.

TIKTOK'S CREATIVE HORIZONS

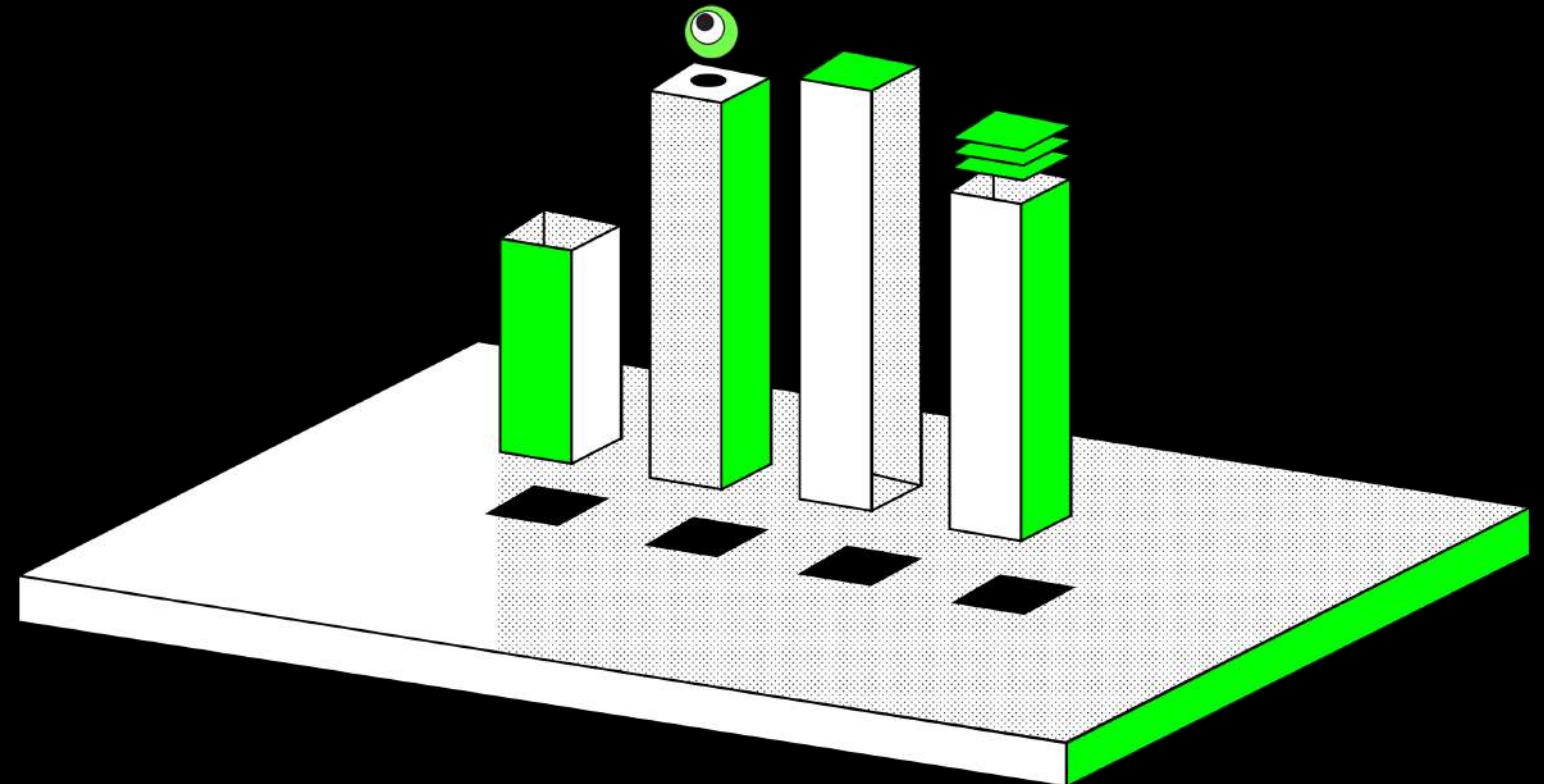

Enter TikTok LIVE, where creativity reigns and individuality shines. This event celebrated the unique talents of digital creators, featuring a mesmerizing media wall and an exclusive “Glam Live Station,” reminiscent of the Met Gala’s elegance. From modern design to unforgettable moments, it was a night dedicated to embracing creativity.

TikTok transforms the ordinary into the extraordinary, offering creators worldwide a platform to express their unique talents. To salute their creativity and influence, we designed an immersive celebration that elevates their artistic journey.

This experience is a tribute to the spirit of innovation and the significant impact creators have on the global stage, spotlighting their individuality in the most dynamic way possible.

DRIVE LIKE EVERYONE'S WATCHING

Guests at our Jaguar pop-up outside Citywalk experienced the thrill of a sports car in a virtual setting. Through an agile and dynamic interactive experience, players raced a virtual Jaguar E-Pace by jumping around in front of 'blank' screens, wearing special glasses that put them in the driver's seat.

To drive traction to our Jaguar pop-up, we created an engaging motion game that drew thousands of curious passersby. Players immersed themselves in the fast-paced fun, jumping left and right to navigate the virtual streets of Citywalk.

Our innovative activation not only entertained guests but also attracted a crowd, making it a memorable highlight of the event. With playful interaction and cutting-edge technology, we transformed the challenge of blending a sports car experience with a virtual platform into an enjoyable reality.

RAISING ADVOCACY WITH WADI

Working along the lines of the key message “biodiversity is essential to the survival of humankind”, we have created “The Wadi Adventure”. An escape room that primarily revolves around survival skills with touch points on biodiversity and how humankind is reliant on it.

The Wadi is a physical adventure game that challenges the participants as they work their way through a series of problems, unravelling information as they go along. And the experiences curated all circle back to real-life situations, making the learning process relevant and relatable even beyond the escape room.

This first leg of an evolving partnership with the client marked the beginning of novel escape room ideations. And, at the end of the experience, participants signed up for the cause, setting their newfound advocacy in motion.

A DAY FOR THE NATION, FROM ALL OVER THE NATION

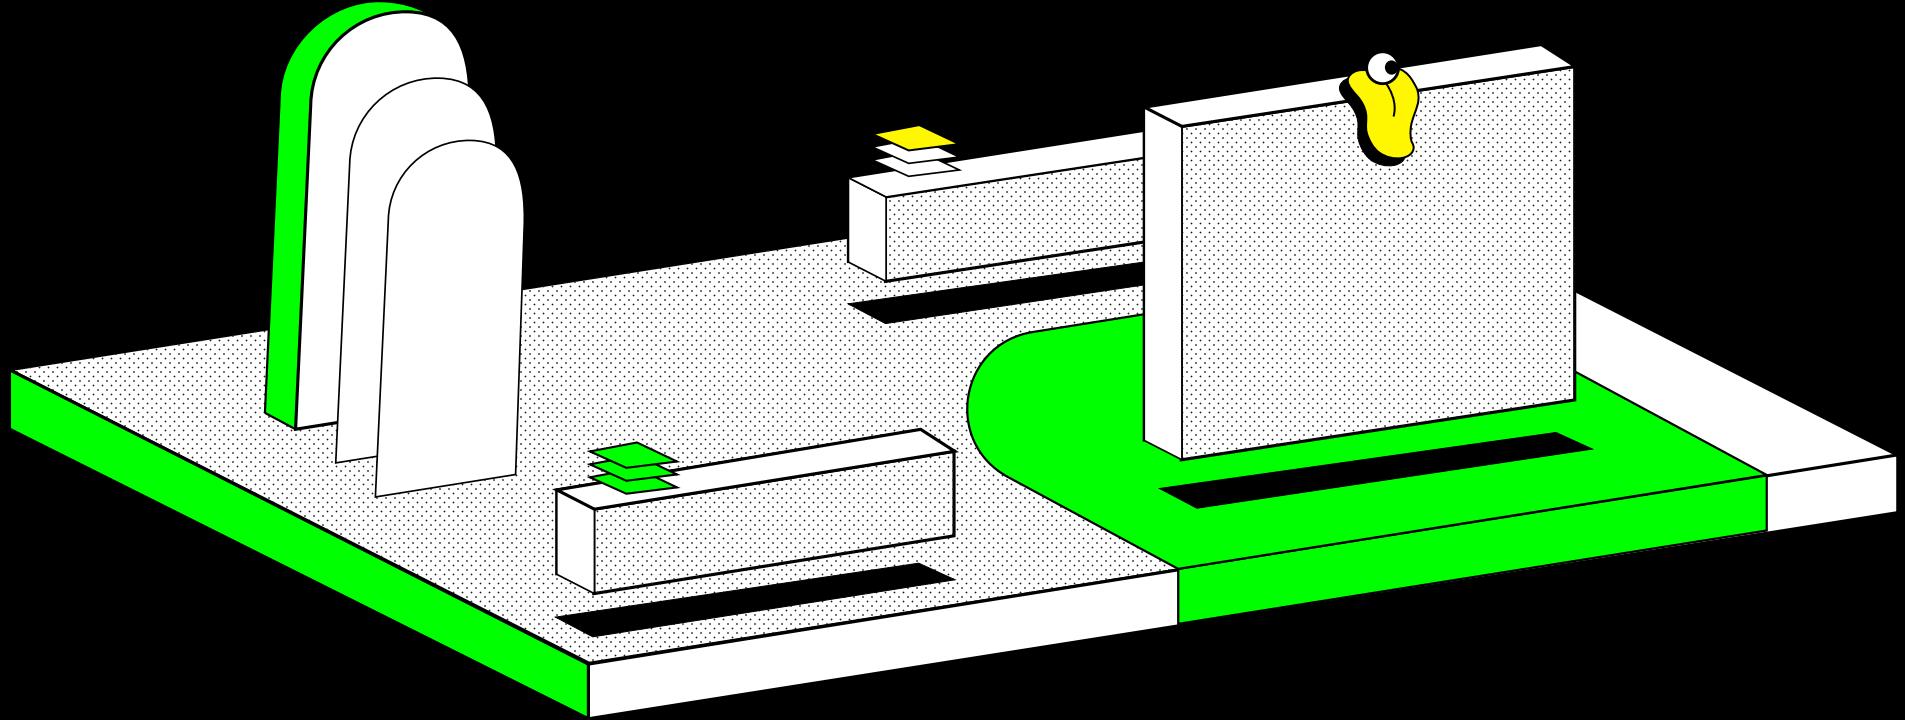

Khalifa University holds an annual celebration for the national day. However, the scope of the event can only reach so far – until now. Through our digital capabilities, we recreated the entire experience in a digital space accessible from anywhere in the country or even the world, at that.

Keeping digital experience at the heart of our solutions, we have incorporated physical elements that connect audience to the true celebration of UAE National Day. Inspired by the celebration, we developed a virtual platform designed and decorated to look like UAE's heritage village.

The platform provided a two-way communication mechanism that allow users to speak, chat, and interact with one another. Stage performances were also incorporated to give the virtual event the same energy as a physical one.

DAY EVENT

INTRODUCING EVOLUTION IN MOTION

The American Hospital brought their commitment to progress and innovation to the forefront with "Evolution in Motion." This dynamic exhibit was the latest installment in a series showcasing the hospital's commitment to staying at the forefront of medical technology and patient care.

Visitors were treated to an immersive journey through the latest advancements in medical technology. The centerpiece of the stand was a rotating modular panel, a technological marvel that was the first of its kind in the region. This rotating panel provided visitors with a dynamic and interactive experience as they learned about the hospital's latest developments. Alongside the rotating panel was a robotic arm, symbolizing the hospital's use of technology to improve patient outcomes and make medical procedures safer and more effective.

And at the center of it all was Cora, a holographic robot that we conceptualized, designed, and named, to position the synergy between humans and technology at the core of the stand – on the seat of evolution.

PIONEERING THE DIGITAL WORLD

Dubai Municipality paves the way for newer, better possibilities. And together with us, greater heights were indeed reached at Gitex.

For this stand, we made the bold and brave decision to build a different style from the usual stand designs at GITEX. And the results were phenomenal. The brand colors used, together with the open stand layout, invited more people to engage with the technological activations installed.

Through our exploration of new possibilities, we did not just build a stand – we made Dubai Municipality stand out.

BREAKING DIGITAL BARRIERS

Tabadul seeks to break trade barriers through innovative solutions. With these solutions, it paves the path towards seamless trade operations in the region. And to translate these core values into physical space, we crafted a highly technological stand that neatly encapsulates Tabadul's vision for the future of trading.

We opted to create an open space floor layout to represent the brand's brave stance of breaking trade barriers. This resulted in a seamless and streamlined journey for the stand visitors.

To further enrich their experience, we also brought immersive activations to the table. All these elements come together under a cohesive structure which also resemble the brand logo.
